Community-Centered Program Development

Community-Centered Program Development is a human focused process for designing programs that benefit and empower the communities they serve.

Community-Centered Program Development

The Community-Centered Program Development Model is based in elements of *Design Thinking*, *The Public Participation Spectrum*, and *the Community Collaboration Continuum*.

Adapted from RACE Academy

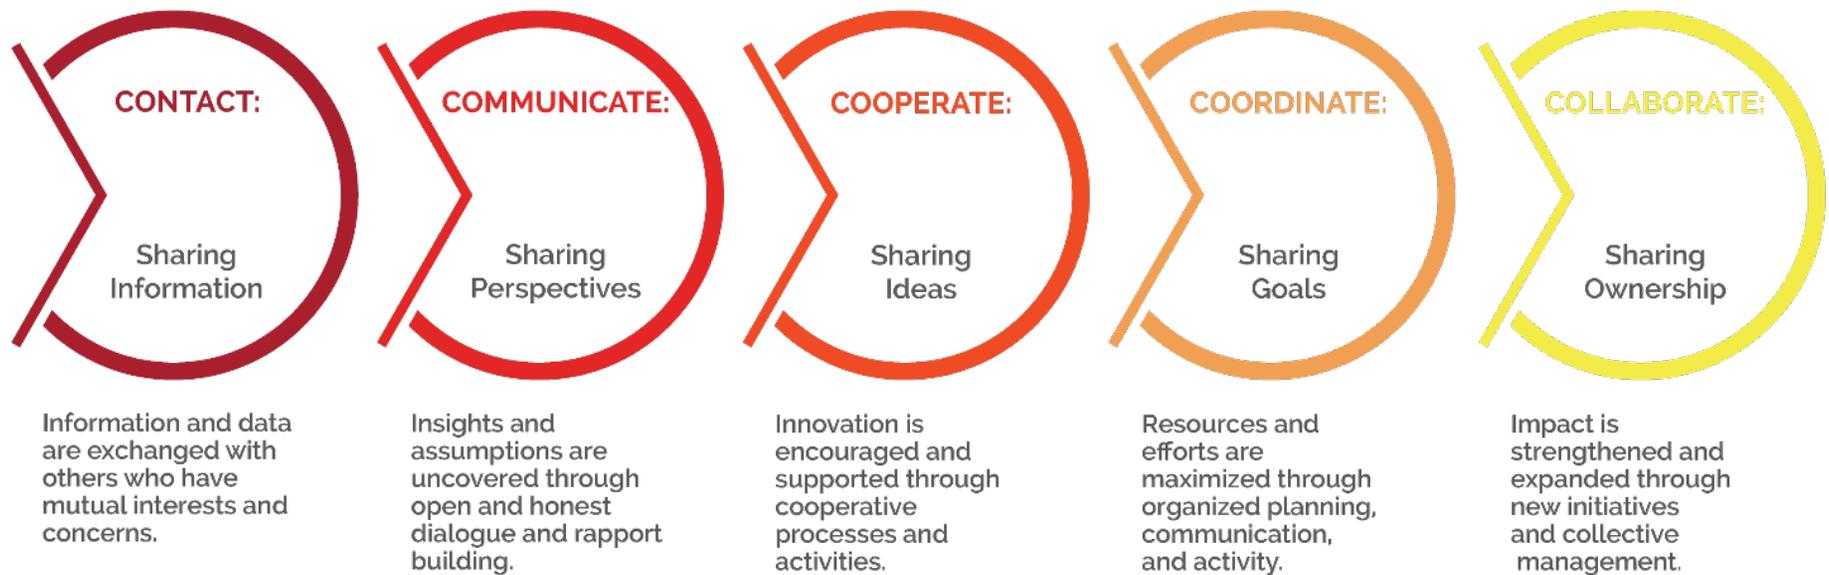

Public Participation Spectrum

	Inform	Consult	Involve	Integrate	Empower
Public Participation Goal	To provide the public with balanced and objective information to assist them in understanding the problem, alternatives, opportunities, and/or solutions.	To obtain public feedback on analysis alternatives and/or decisions.	To work directly with the public throughout the process to ensure that public concerns and aspirations are consistently understood and considered.	To partner with the public in each aspect of the decision including the development of alternatives and the identification of the preferred solution.	To place final decision making in the hands of the public.
Promise to the Public	We will keep you informed.	We will keep you informed, listen to and acknowledge concerns and aspirations, and provide feedback on how public input influenced the decision. We will seek your feedback on drafts and proposals.	We will work with you to ensure that your concerns and aspirations are directly reflected in the alternatives developed and provide feedback on how public input influenced the decision.	We will work together with you to formulate solutions and incorporate your advice and recommendations into the decisions to the maximum extent possible.	We will implement what you decide.
